Note to Editors

The Company

Nu-Oil is a development and production company, which utilises appropriate development approaches to create value from undeveloped and mature oil and gas assets. Nu-Oil is building a portfolio of development and production assets with an emphasis on stranded and marginal discoveries which can be unlocked using cost-effective development solutions.

NU-OIL AND GAS PLC
AIM ticker: NUOG

Nu-Oil targets thoroughly appraised fields located in basins with stable political and regulatory regimes. By doing so Nu-Oil minimises exposure to the risks associated with frontier plays, particularly exploration and appraisal risks.

Nu-Oil's 50% owned subsidiary, Marginal Field Development Company Ltd. ("MFDevCo"), has developed offshore production solutions that improve the economics of oil projects by significantly lowering development costs compared to conventional approaches. To implement its solutions, MFDevCo has established the Marginal Field Delivery Consortium ("the Consortium"), a group of leading global engineering specialists who provide the skills and capability required to deliver projects. Nu-Oil will utilise MFDevCo solutions and the capability within the Consortium to develop and deliver its projects.
